easyalgos

The Expert Advisors industry was broken. We fixed it.

The Expert Advisor trading industry has long been dominated by aggressive marketing, inflated license fees, and rebranded clones. Serious traders were left with confusing setups and no way to verify performance.

EasyAlgos was created to fix this.

THE PROBLEM

Introduction

The Expert Advisor trading industry has long been dominated by aggressive marketing, inflated license fees, and rebranded EA clones. Many developers prioritized short-term sales over long-term performance, pushing copy-paste strategies with no support, no transparency, and no real accountability.

High prices led to widespread piracy and cracked versions of Expert Advisors being shared across forums and Telegram groups. Meanwhile, serious traders were left with confusing setups, poor documentation, and no way to verify what they were really running — or why it was failing.

To fix it, we built a platform where:

Top-performing Expert Advisors

Traders get access to top-performing Expert Advisors with at least 6 months of 3rd-party verified live performance

Seamless Infrastructure

Access is seamless thanks to custom VPS servers preloaded with MetaTrader 5 terminals and a curated library of fully configured Expert Advisors

100% Free Access

Thanks to our introducing-broker model — no license fees, no setup costs, no VPS charges.

Incentives Aligned

Developers are rewarded by actual usage, not hype or upfront sales.

THE SOLUTION

What is EasyAlgos AI?

EasyAlgos is a complete ecosystem for Expert Advisors trading — giving you free access to high-performing Expert Advisors, done-for-you infrastructure, and maximum transparency.

Built for serious traders who want simplicity and performance, EasyAlgos removes the typical friction of running EAs:

- **No license fees, commissions or subscriptions**
- **No complex installations or setups**
- **Only proven EAs with at least 6 months of third-party verified live performance**

You connect your broker account, choose the Expert Advisors you want to run, and everything operates through EasyVPS — a private server powered by ForexVPS.net and pre-configured for optimal execution and minimal latency. You maintain full control of your funds at all times.

Whether you're just getting started or scaling a proven strategy, EasyAlgos gives you the tools and transparency needed to trade confidently — without paying a cent.

BUILT FOR SERIOUS TRADERS

Who is this for?

EasyAlgos was built for traders who value transparency, performance, and aligned incentives — not hype, shortcuts, or false promises. It's for you if:

- You're tired of false promises, repackaged systems, and "get rich quick" schemes that plague the EA industry
- You understand that Expert Advisors aren't magic money machines, and that higher returns come with higher risk
- You want to build a diversified portfolio of EAs from multiple verified developers — not rely on a single system
- You prefer to put capital into trading, not spend hundreds or thousands on licenses or subscriptions
- You want to trade with a minimum professional balance, and use real data — not screenshots or fake backtests
- You believe developers should be rewarded through performance and usage, not upfront sales
- You're looking for a community of serious traders, direct access to developers, and support from industry-leading players
- You may be a beginner, intermediate or an experienced trader

How it works

EasyAlgos was designed to remove the complexity from Expert Advisors trading.

From onboarding to execution, every step is streamlined so you can focus on trading — not configurations, downloads, or tech issues. Track trades, EA performance, account metrics, and access AI tools or developer support — all in one place.

Sign Up at EasyAlgos

Create your free account at easyalgos.ai to access the platform.

Link Your Broker Account

Securely connect your broker account to EasyAlgos in just a few clicks.

Get Your EasyVPS

Receive access to a private, pre-configured VPS powered by ForexVPS.net.

Select & Run Expert Advisors

Browse a curated selection of high-performing EAs, set your parameters, and start trading automatically.

Monitor from Dashboard

Track trades, EA performance, account metrics, and access developer support.

CURATED ECOSYSTEM

Expert Advisors

EasyAlgos is not an open platform. We only list Expert Advisors and developers that meet a rigorous set of standards, ensuring traders get proven performance, transparent strategies, and long-term reliability.

EAs must have:

Verified Live Track Records

At least 6 months of MyFxBook-verified live trading results. No demo accounts. No screenshots. Real trades, real performance.

10+ Years of Backtesting Data

Each EA must include long-term backtests using high-quality data across changing market conditions.

Original Strategy & Logic

We only accept original systems — no rebranded clones, repackaged indicators, or recycled Expert Advisors.

Genuine Client Feedback

Each developer must have authentic client reviews (e.g., from MQL5, Trustpilot, etc.), showing real user experience and long-term trust.

Transparent Risk Management

All EAs must clearly outline risk, capital allocation, and money management rules — no hidden logic or “black box” behavior.

INFRASTRUCTURE

EasyVPS

Running Expert Advisors typically requires manual downloads and installations, complex configurations, and constant maintenance. EasyVPS eliminates all of that.

Every EasyAlgos user gets access to a private, pre-configured VPS server — powered by industry leaders ForexVPS.net and hosted in Equinix data centers for ultra-low latency execution.

Whether you're running one EA or a full portfolio, EasyVPS ensures you get institutional-grade performance — without needing to touch a single setting.

What's more: these premium servers — which can cost up to $980 per year — are provided at no cost to EasyAlgos users.

How EasyVPS makes trading easy for you

Plug & Play

All Expert Advisors are pre-installed and pre-configured. Just drag them onto your charts and you're ready to go

Cloud-Based Trading

Your trading runs on ultra-fast infrastructure hosted in Equinix data centers. No need to leave your computer on or worry about uptime.

24/7 Support

ForexVPS.net's support team is available around the clock to help with any technical issues related to your VPS environment.

One-Click Updates

Get the latest EA versions instantly. No manual downloads or reinstalls — everything updates seamlessly.

Where’s the catch?

At EasyAlgos, people often ask:
"If everything is free... what's the catch?"

There isn’t one.

You actually don’t pay us anything — **no license fees, no subscriptions, no commissions, no hidden markups**.

THE BUSINESS MODEL

Here’s how developers get paid:

We work exclusively with IC Markets and IC Trading, two of the most trusted and regulated brokers in the industry.

When you connect your account and trade using the Expert Advisors on our platform, the broker earns a small fee (called a spread or commission) on every trade. As their partners, a portion of that fee is shared with us and with the EA developers.

This creates a win–win–win model:

- **You win because you get access to high-quality, verified EAs and infrastructure — completely free**
- **Developers win because they earn long-term income based on real usage, not one-time sales**
- **Brokers win because they gain loyal, engaged clients who actually trade**

There are no payments of any kind, and no hidden costs. If you succeed, everyone in the ecosystem benefits — and that’s exactly how EasyAlgos was designed to be.

Our Partners

EasyAlgos is powered by trusted industry leaders that ensure top-tier execution, support, infrastructure, and reliability for every trader.

IC Markets

One of the world's biggest and most trusted brokers, offering:

- Ultra-low spreads and lightning-fast execution
- Institutional-grade infrastructure (Equinix servers)
- Seamless compatibility with EAs

IC Trading

A growing broker known for:

- Supporting European Union, Australia and Brazil residents
- Solid execution and client support
- Flexible conditions for retail traders

ForexVPS.net

Premium VPS provider trusted by algo traders:

- Ultra-low latency hosting in Equinix data centers
- 24/7 technical support
- Servers valued up to $980/year -included free for EasyAlgos users

BEST IN CLASS

User dashboard

The EasyAlgos user dashboard gives you everything you need to monitor your trading activity, access tools, and stay connected — all in one place, with real-time transparency.

Portfolio Analytics

Track your account growth, balance and equity curves, drawdown metrics, and overall performance — all updated in real time.

Trades history

Review every trade executed by your Expert Advisors, including entry/exit points, timestamps, lot sizes, and outcomes — with full transparency.

Remote Desktop Support

Get direct support to your EasyVPS server instantly through built-in remote desktop services.

AI-Powered Tools

Unlock market forecasts and other AI features designed to help you better understand EA performance.

NOT TRADING ALONE

Community

At EasyAlgos, you're not trading alone.

Join a growing Telegram community of like-minded traders, EA developers, and industry professionals — all collaborating, sharing, and learning together.

- **Direct Access to Developers**
  Ask questions, share feedback, and get real-time support directly from the creators of the Expert Advisors you run.
- **Active Telegram Group**
  Engage with fellow traders, get updates, and discuss market conditions in our exclusive Telegram community.
- **Built Around Collaboration**
  Whether you're a beginner or a seasoned trader, you'll find a supportive environment designed to help everyone grow — together.
